

It's a New Day in the American Workplace

Safe Workplace software and smart phone APPs provide safety assurance to companies and employees.

For human resource departments: Real Time tracking of concerns and interactions with quick response. Multiple notifications capacities for HR departments. The Safe Workplace HR dashboard does all tracking and reporting, This enables companies to be proactive in protecting it's employees.

For employees: Record and report interactions via text or app and get an accountable response from HR. The non-APP version is available to use on employees phones immediately for immediate use. The APP version is available for the employees as desired.

- Safe Workplace is a unique tool to keep companies and their employee interactions positive at a fraction of the cost of other potential programs.
- Company software pricing is \$3-\$6 per employee. Smart phone app is free if needed.

It's a New Day in the American Workplace

Corporate APP: The corporate reporting system for employees is shown here. The Safe Workplace allows input of name, location, id number, work email, private email, anonymous or signed and a text description of the concern or incident. Any picture, voice file or video that has been saved in the phone gallery can be sent to corporate of up to 250Mbyte size. The Safe Workplace system records any incident by date, time, location and replies to the employee enabling the company to be proactive in preventing any concern or incident going unanswered.

Corporate Dashboard: Safe Workplace is setup for 1,2,3 or 4 levels of local, regional and national offices. Management can see incident or concern in real time. Branch HR, Regional HR, National HR and any additional management can be notified of an incident. Corporate reports include by week, month, quarterly and annual reporting. Reports can be sorted by location. All information is password secured.

Recording APP (corporate or consumer app store): Click on the icon on the phone and the screen turns black and recording has started. The phone records both sound with front and back cameras. To stop recording press the black screen or any button for 2 seconds. Any sound or images that are in the vicinity of the phone are recorded while the screen remains black.

APP Settings: The program options include which camera to use, maximum record time, resolution, stop delay and a record schedule for meetings. Videos can be saved in the phone gallery or sent using other phone services.

This APP works on all iPhone(s) and any Android phone 2 years old or newer.
